Brian,

Just wanted to provide an update on the Coosa Basin sampling. Sampling is going well with one exception.

The team is working from road crossings identified during project planning. The site just downstream of Loopers Bend (CON2 - Loopers Bend Rd) is gated by Dalton Utilities and the team is unable to access that site. We are assessing whether we can utilize a boat to access the site or an alternative site within a reasonable distance. The nearest boat ramp is 10 miles away and depths are very shallow.

If we are unable to make this work, we still have 2 locations below Loopers Bend; however, there are some tribs that enter upstream. The team is also assessing options for adding a trib station if we cannot access CON2.

I'll keep you posted.

Thanks,

John

Stacey and John,

Please call ASAP.

We completed 5 sites so far.

We can not access our loopers bend site as it is gated off by Dalton Utilities.

Options:

- 1: skip site
- 2: get access
- 3: replace site with sample on Coosawattee River

Please advise, thanks!

Nate
